WHAT IS A TRUE MAN?

WHY WOULD YOU WANT TO BECOME ONE?

I believe this book helps define the attributes of a True Man, but the reality is I could have included so much more. However, what I've come to discover is that only you can define what a True Man is for you. Only you can set up your road map; you set the perimeters of your road trip through life; only you can go on the open road journey. However, you define it, living the life of a True Man can be a beautiful place to be in.

I love the idea of being a True Man, especially at this midpoint in my life. It just sounds like a refreshing way to live, like standing next to the ocean on a hot summer day with the waves crashing around me. Or, how about a sunny day in the mountains with a light breeze to cool you off? Any way you slice it, becoming a True Man feels so good.

The journey of life has gotten me to this point. I think more about my legacy and less about what might have been versus what can be. I've forgiven myself for the stupid things I've done and the people I've hurt. Road rage seems to make a lot less sense. Seeing how many cans of beer I can drink and how late I can stay up are things of the past.

I don't want to be angry, sad, lonely, or mystified by wondering if the world is conspiring against me. These things don't feel good, and I no longer like camping out in them. Why one would do it in the first place is certainly a matter of choice, and I often chose wrong.

Is my story unique, or am I a special case? Not by long a shot, more men than not have traveled the same path I did. Some learn faster than others, and some men never learn at all. I think many men hit this crossroads in their lives at a certain point, and things can crash around them if they are not prepared. I'm not sure how you prevent the crash without the journey, but perhaps we can be better prepared for the next "it" when it happens, and it will happen. Maybe we can do it with a lot less damage by making it easier and faster to recover.

I know this: a man can't be true without being oriented in God's word and having a few good teammates, wingmen, accountability partners, or good buddies to get through life's daily challenges.

And thus, the founding of True Man.

THE TRUE MAN BEGINNING

True Man began, like all innocent things do, with a hope and a dream. My friend Paul Baily and I wanted to make a small difference in the world by bringing men together in a small group. We were just two guys who felt the idea of business networking had gone from giving to taking, and we set out to change that.

Rather quickly, we realized that forming a faith-based group was what we wanted. In our small group, we could have thoughtful conversations and build relationships that were more than an inch deep. Our experiences taught us that many men were missing out on opportunities to look inside themselves under the mentorship of others. Through our framework, men could form the deeper and more profound Christian friendships that they so desperately longed for.

The inspiration for this book stems from the development of our men's small group that met at Paul's office on a weekly basis. As I spoke about at the beginning of the book, it also stems from hitting the road to one of our favorite coffee shops, Open Road Roastery, in Columbus, North Carolina.

There is something to be said about being in a car and experiencing the "open road" with a friend. Road trips provide an opportunity to bond and talk. It's the shared adventure of navigating unfamiliar roads or enjoying scenic views. It's about time away and pausing from the routine of life. It's about escaping the stress we find ourselves under and putting the pressures of the day behind us.

In many respects, the open road is a metaphor for a man's life and the journey or path that we go on. The road of life captures a dynamic and evolving adventure with various twists, turns, and unknown destinations.

Each man embarks on his own journey, navigating the open road with a sense of anticipation and curiosity. The road is lined with milestones representing achievements, crossroads symbolizing choices, and scenic overlooks offering moments of reflection.

As he travels, the road presents challenges – steep hills to climb, unexpected detours, and occasional rough patches. Yet, these challenges are not obstacles but rather opportunities for growth and resilience. The vehicle he drives is his character, powered by determination and fueled by the experiences gathered along the way.

The open road is not a solitary path but a shared adventure. Traveling with a friend like Paul not only made the trip more fun, it also allowed us to share stories and insights, and it gave us opportunities to grow and learn from each other. Relationships are the rest stops, where connections are forged, and the shared laughter and tears become cherished memories.
